EDUCATION

Higher School of Economics

B.Sc. Applied Mathematics and Computer Science

September 2020 – July 2024

Moscow, Russia

PERSONAL PROJECTS (available on my github)

Potok app | [Django + PostgreSQL + Flutter](#)

since May 2020

- A social media aggregator similar in interface to TikTok but with static content
- Developed an REST Api backend server, content aggregator for VK, Reddit and Instagram and multiplatform Flutter APP

0xLeaders.com NFTs | [Node.js + Web3 + Python3/Pillow + ETH Smart Contracts + Truffle](#)

October 2021

- created NFT collection and minting website
- Designed and generated 2200 NFT cards of world leaders based on scientific databases
- Coded website for advertising and minting these NFTs (minting is a process of loading NFT to blockchain)

Webapp for NASA Hackathon | [Node.js](#)

December 2020

- created webapp that simulates earth and satellites from the NASA database and talks about the problem of space debris

WWDC21 Scholarship Submission | [iOS development](#)

May 2021

- Received WWDC21 Scholarship award for my Conway's Game of Life app
